

DOCUMENTO DI REGISTRAZIONE
POLITICA AMBIENTALE

Data: 04/01/2022

MO1002

Rev.:02

TCA S.p.a is committed to performing its work in full compliance with the environment, in accordance with the laws in force, ensuring that all operations are carried out in accordance with compliance obligations, correcting any non-compliance related to these obligations. TCA strongly believes in the responsibility that the commitment for a sustainable (compatible) development, as well as a value of business ethics, they also represent an important variable of the corporate management strategy in the future.

On the pollution prevention front, in order to achieve this, TCA S.p.a. undertakes to guarantee the continuous improvement of its environmental performance, programs for the reduction of direct and indirect environmental impacts and for the optimal use of resources (water, emissions and waste management).

To ensure the compatibility between production activities and the protection of the environment and the territory, continuous monitoring and control systems have been set up, which guarantee not only compliance with the mandatory regulatory limits in the environmental field but also internal and external interventions consent in real time, respecting the needs of operators, populations and the environment.

Furthermore, complete availability regarding cooperation, involvement and environmental commitment with local organization, territorial institutions, regulatory bodies, local communities and stakeholders in general, promoting a transparent and cooperative relationship in order to set up the most suitable protection and preventive measures.

Nowadays, in fact, only a commitment in the environmental industry can enable to satisfy two types of inseparable and complementary needs. On the one hand, providing timely answers to the needs of the market offering clients products and services that are ever more compliant with their expectations; on the other hand, to strengthen its commitment to ensure that production is carried out at increasingly higher levels of compatibility with the territory and environmental safety.

Attention to technological upgrades, in terms of applied research in the business, is one of the strategic commitments on which TCA bases its corporate development strategy.

TCA is continuously oriented towards the definition and achievement of the objectives that are periodically assessed during management review and whose monitoring aims to continuously improve the performance of its management system.
